

A collection of diffusion materials that photographers and filmmakers can use to affect the character, shape and quality of the light in their shot. The kit includes 15 different pieces of diffusion each designed to produce varying diffused effects and to offer control of the softness and shadow of the beam of light.

- White Diffusers for heavy to medium diffusion of the beam.
- Tough Spun Diffusers for light diffusion that also adds a subtle texture to the beam.
- Tough Silk Diffusers that offers heavy to medium diffusion and directional control of the beam.
