

## e-colour+ Edge Marked Rolls

e-colour+, Rosco's comprehensive system of color filters for film and television production, now offers a range of rolls available with edge marking. Every foot of the roll is marked with imperial measurement, down to the last foot for easy cutting and tracking. Rosco has developed a new part code to differentiate the edge marked rolls and below is a comprehensive list of all e-colour+ filters available as edge marked rolls. All rolls measure 48" x 25' (1.22m x 7.62m).
