

Photo Lighting Kit

A selection of filters, hand-picked to be the essential lighting filters photographers need. The kit contains one piece each of 20 different colors that color correct and add colored effects to the light in your shot.

- CTO and other filters that warm up the lights in your shot.
- CTB filters for creating cool-lit lighting effects.
- Neutral Density filters for lowering the overall output of non-dimmable light sources.
- A range of color effects filters to add bold, dramatic color into your shot.
